

Micro Mesh Grating

Our FRP grating, anti-slip products, and modular handrails are ideal for use in commercial and leisure marine and waterside environments. They are low maintenance, durable, and long-lasting. FRP is an ideal replacement for traditional timber decking materials in marine applications, including marinas, pontoons, walkways, jetties, ports, and gangways and ramps. Our hard-wearing products provide a high degree of resistance to slips and corrosion and will not rot in saltwater nor leach harmful chemicals into the water.

Mini Mesh Grating

Product Solutions

Install Mini Mesh Grating for safer pedestrian access areas suitable for prams, wheelchairs, and bikes. Or use our Stair Treads in water access ways for a more durable, anti-slip alternative to timber. With a cutting service available, and non-standard sizes and finishes, we can provide a solution for most applications.

Modular Handrails
