

Micro Mesh Grating

Our FRP grating, anti-slip products, and modular handrails are ideal for commercial and leisure marine and waterside environments, including marinas, pontoons, walkways, jetties, ports, gangways, and ramps. FRP is low maintenance, durable, and long-lasting, providing a high degree of resistance to slips and corrosion. It will not rot in salt water, nor will the material leach harmful chemicals into the water.

Mini Mesh Grating

Mini Mesh Grating

Product Solutions

With a cutting service available, and non-standard sizes and finishes, we can provide a solution for most applications. For safer pedestrian access areas, consider installing Mini Mesh or Micro Mesh Grating suitable for prams, wheelchairs, and bikes. Or use our Stair Treads in water access ways for a more durable, anti-slip alternative to timber.

Stair Treads, Nosing, and Flat Sheet
